Education

Veermata Jijabai Technological Institute (VJTI)

Bachelor of Technology in Information Technology **8.72 CGPA**

November 2022 – Present

Mumbai, Maharashtra

D.G Ruparel College of Arts, Commerce, and Science

HSC Board, MHT-CET **99.60%ile**

February 2022

Mumbai, Maharashtra

Relevant Coursework

- Data Structures
- Database Management
- Computer Networks
- Algorithm Analysis
- Computer Architecture
- Artificial Intelligence

Professional Experience

Wells Fargo

Intern Analyst – GenAI Automation

June 2025 – August 2025

Bengaluru, Karnataka

- Developed solutions to automate user interface testing, streamlining manual quality assurance processes using GenAI.
- Collaborated in designing agent-based workflows to enable automated test case generation and continuous feedback, enhancing software reliability and consistency.
- Contributed to organization-wide test automation by implementing tools that adapt testing solutions to various web applications with minimal manual configuration.
- Helped accelerate quality assurance cycles by introducing scalable, reusable approaches that integrate smoothly with existing software development practices.

Selected Projects

Full-Stack Travel Management System 🗒️ | 🗄️ | SQL, MariaDB, Shell, PowerBI

May 2024

- Built a full-stack travel management system with a **MariaDB** database for seamless data management
- Implemented **user-friendly UI with comprehensive CRUD operations** and secure **role-based access** control at UI and database level, improving user security
- Created **user tracking system** and **automatic bill generation** using URL parameters, for user data and billing
- Accomplished a **45% reduction in data redundancy** and a **30% improvement in query performance** by designing an efficient database schema with SQL Workbench and implementing normalization (BCNF)

YouTube Video to Visual Notes 🗒️ | 🗄️ | Python, NLP, BART, ViT, React

January 2024

- Collaboratively engineered ML solutions such as a **frame analyzer**, text summarizer, language translator, Q&A chatbot using **BART** (summarization) and **ViT** (image classification), integrated transcript retrieval with language detection
- Developed a **RESTful API** for model communication and **optimized it** with Flask-Caching, reducing latency by **15s**

ChessAI 🗒️ | 🗄️ | Python, Pygame, Numpy, Genetic Algorithms

November 2023

- Developed a **chess game** by engineering the entire **game logic** system, user interface, and implementing special moves
- Achieved a **40% improvement** in AI Engine performance, despite computational limitations, as measured by computation time, by implementing **Minimax, Negamax, and Alpha-Beta Pruning algorithms** from scratch
- Increased AI's strategic decision-making capability, by designing an **evaluation function** having **over 20 parameters**

Technical Skills

Languages: Java + OOPs, Python, SQL

Domains: Machine Learning, Web Development

Developer Tools: Git/GitHub, Docker, Anaconda, Linux, Jupyter, Postman, MySQL Workbench

Technologies/Frameworks: Spring, Flask, Groq

Leadership / Extracurricular

Lecturer and Media Head at ProjectX, VJTI

March 2023 – Present

- Selected for an exclusive **mentorship program** (20 out of 250+ applicants selected)
- **Led media and promotional activities**, to enhance coding culture, resulting in a 30% increase in workshop attendees
- **Mentored teams** on Machine Learning projects
